PROFILE

Senior Data Analyst and Industrial Engineer with 4+ years of experience in Supply Chain Digitization, Data Modeling & Stewardship, Business Intelligence Development, and Tech Logistics, proficient in SQL, LookML, Google BigQuery, PowerBI, Python, R, JavaScript, HTML, ERP Dynamics 365, and Excel. Canadian and Jordanian citizen, native in English and Arabic.

EDUCATION

Georgia Tech University, School of Computational Science and Engineering
Master of Science in Analytics (MSc)

Atlanta, GA

January 2023 - Present

- Relevant Coursework: Data Science, Machine Learning, ETL, Object-Oriented Programming, Web Development, Cloud

Harvard University, School of Engineering and Applied Sciences
Professional Certificate in Data Science (PCert)

HarvardX

February 2021

- Relevant Coursework: SQL, Python, R, Visualization, Probability, Wrangling, Regression, Machine Learning & AI

Concordia University, School of Engineering and Computer Science
Bachelor of Science in Industrial Engineering (BEng)

Montréal, QC

May 2019

- Relevant Coursework: Operations Research, Stochastic Models, Simulation, Calculus, Probability & Statistics

PROFESSIONAL EXPERIENCE

Chalhoub Group – *Largest luxury goods retailer and distributor in MENA*

Dubai, UAE

Data Analyst II - Supply Chain Central Team – Managed Companies Management

January 2022 – Present

- Worked alongside the Chief Demand and Supply Planning Officer as part of the Central Supply Chain Management and drove the Group's upstream and downstream strategic direction by establishing executive, management, and operational reporting and prescriptive analysis on eight global retail and distribution business entities of over 500 unique brands.
- Modeled and coded over thirty KPIs and Looker BI dashboards used by executive-level management to track inventory, service levels, weekly trade, sell-in sell-out, vendor & supplier performance, and e-comm supply chain. Improving standardized visibility by 100% and delivering actionable insights to key stakeholders.
- Engineered and simulated 10TB of supply chain data using Google BigQuery and SQL, standardizing product grading on a global, country, and brand level and identifying the root cause analysis on fill rate and on-shelf availability.
- Governed Supply Chain data as a data steward, authorizing over 200 LookML data merges from supply chain data analysts, maintaining supply chain data governance to 100%.
- Organized and hosted two offsites for supply chain leaders, senior managers, and data analysts on supply chain KPI alignment and organized a dashboard-building competition in which I built the highest-ranking dashboard with a performance score of over 100%.

Goodfood Market Corporation – *Canadian online grocery delivery*

Montréal, QC

Operations Analyst – Big Data Analytics & Digital Operations

April 2021 – January 2022

- Promoted to Operations Analyst within eight months for exceeding goals and supporting company culture.
- Configured the weekly system changeover for over 1500 new SKU items in the Goodfood E-commerce backend database and ERP warehouse management system, determining multi-facility SKU picking & storage locations and inventory replenishment triggers based on analysis of order volume projections and operations cost analysis.
- Automated customer order data pull schedules from Looker into Google Sheets to develop an interfacility inventory replenishment analysis model using JavaScript, improving item replenishment availability and visibility by 50%.
- Strategically assigned over 3000 multi-facility SKU storage and picked location data into the Goodfood E-commerce backend database and ERP warehouse management system using Microsoft SQL Server Studio queries.
- Created over ten automated analysis tools and visualization dashboards for logging short ship data, managing labor cost, and tracking shipping carrier progress, providing daily item management decisions to senior directors and executives.

Production Supervisor – Supply Chain Operations

August 2020 – April 2021

- Utilized Excel to implement data cross-validation for recipe batch production requirements on 600+ batches, which reduced total production errors by 95%.
- Wrangled multiple recipe production datasets stored in Google Data Studio using Excel pivot tables to remodel and visualize datasets, allowing operations and senior management to track the location and status of recipe batch production.
- Actively supervised workflow, delegated strategy, and trained production and inventory teams of over 25 associates to maintain operational efficiency, increasing overall recipe pallet building productivity by 20%.

United Parcel Service (UPS) – *Global shipping & logistics*

Montréal, QC

Industrial Engineering Specialist – Route Optimization Engineering Project Team

April 2019 – May 2020

- Utilized proprietary mapping and optimization software to plot and schedule delivery route information for over 70 training and verification rides on deployed driver groups, decreasing route delivery mileage by 15%.
- Extracted and manipulated route-specific statistics stored in UPS proprietary databases using Excel Visual Basic to generate over 25 technical reports, providing corporate-wide visibility to overall project deployment progress.
- Optimized and scheduled over 1800 driver and helper meetups in all regions of Montréal and Laval using UPS logistics software, resulting in an increase of 70 stops per package car during peak season.
- Created a Master Operating Plan for the Data Acquisition department documenting the data collection and transformation methods for package processing at UPS, standardizing data processing operations and decreasing errors by 25%.
